Subject: From Nidheeswar parents

To: <[wafairshads@gmail.com](mailto:wafairshads@gmail.com)>

Hi,

Based on the request I am writing this to express our overall experience with maths class from Wafa. Overall Nidheeswar liked the class and the teacher and Maths has become one of his favourite subject. Recently maybe due to Covid and vacation period he was more interested to play than the extra Maths class, but you have made it more enjoyable and increase his logical thinking. We can see the result of the class in his regular Maths class in school.

We also liked the idea of having few competitive students along with Nidheeswar so that he has the interest going forward. Please also teach him in general the importance of studying and learning things by understanding, sometimes he is still interested to play Playstation and we have to force him to attend the Maths class :)

He also liked as Wafa is asking him about his sports and his interest in other activities so that we gets comfortable with the teacher.

One suggestion is maybe give some assignments or test after the class so that we as a parents know the topics that are taught.

Thanks again and keep up the good work.

BR

Vijay and Sarida
