Madam,

My son Master. S. VENKATESH, II Std has been under your academic care and support for almost two years. We, as parents realise significant improvement in his vocabulary, language and attitude. The kind of curriculum you adopt at your centre, really speaks volume and helpful in translating its utility in his school. Although he was above average, but lacking little more inertia to top/secure outstanding, has now thoroughly undergone a rapid change and able to adopt his mind to long for the first slot position in any academic activity. We also observe considerable improvement in his consistency and perseverance. I can't but to express the courteous support of Ms. Bhuvaneshwari his teacher at your centre and we are sure he would not have risen to this level but for her personalised care. From his reaction, we could visualise her methodology should have been like citing an oasis after a fatigue long walk in a desert. We seek your continued personalised coaching and care to all the students enrolling in your centre in the years to come.

V. VIJAYALAKSHMI
